Technology Stack

Date	3 October 2026
Team ID	SWTID-2026-5338
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	**Frontend / Client-Side** *(e.g., React, Angular, HTML/CSS)*	*HTML, CSS, JavaScript*	*Creates a responsive and interactive interface for users to enter prompts and view generated comic stories.*

2	**Backend / Server-Side** *(e.g., Node.js, Python/Django, Java)*	*Node.js, Express.js*	Handles server requests and connects the application with the Gemini API.
3	**Database / Data Storage** *(e.g., MySQL, MongoDB, PostgreSQL)*	*MongoDB*	*Stores user data, generated stories, and comic-related information in a flexible document format.*
4	**Cloud / Hosting / Deployment** *(e.g., AWS, Azure, Heroku, Docker)*	*Vercel*	*Provides easy deployment and scalable hosting for the web application.*
5	**Version Control & CI/CD**	*GitHub*	*Provides source-code version control, collaboration, and project backup*

	(e.g., GitHub, GitLab, Jenkins)		
6	**Third-Party APIs / Other Tools** *(e.g., Stripe, Twilio, Google Maps)*	*Google Gemini API*	*Provides AI capabilities for generating comic stories from user prompts using Gemini models.*
