Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	
Type of Testing	Load Testing
Target Module / API	ComicCraft Story Generation API – `POST /generate` and
Test Environment	Local
Test Date	02-10-2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Multiple users submit story prompts to the **Story Generation API (`POST /generate`)**.	5	60	The API should process the requests successfully and generate comic story content without application failure.
2	Multiple users request **five-panel comic generation (`POST /generate-comic/json`)**.	3	120	The system should generate the requested comic panels and return the response successfully.
3	Multiple users access the **ComicCraft homepage and API documentation (`/docs`)** simultaneously.	10	60	The application pages and API documentation should remain accessible without errors.
4	Multiple users perform comic generation requests continuously during the test period.	5	120	The application should continue processing requests without crashing or becoming unavailable.

Step 3: Performance Test Results

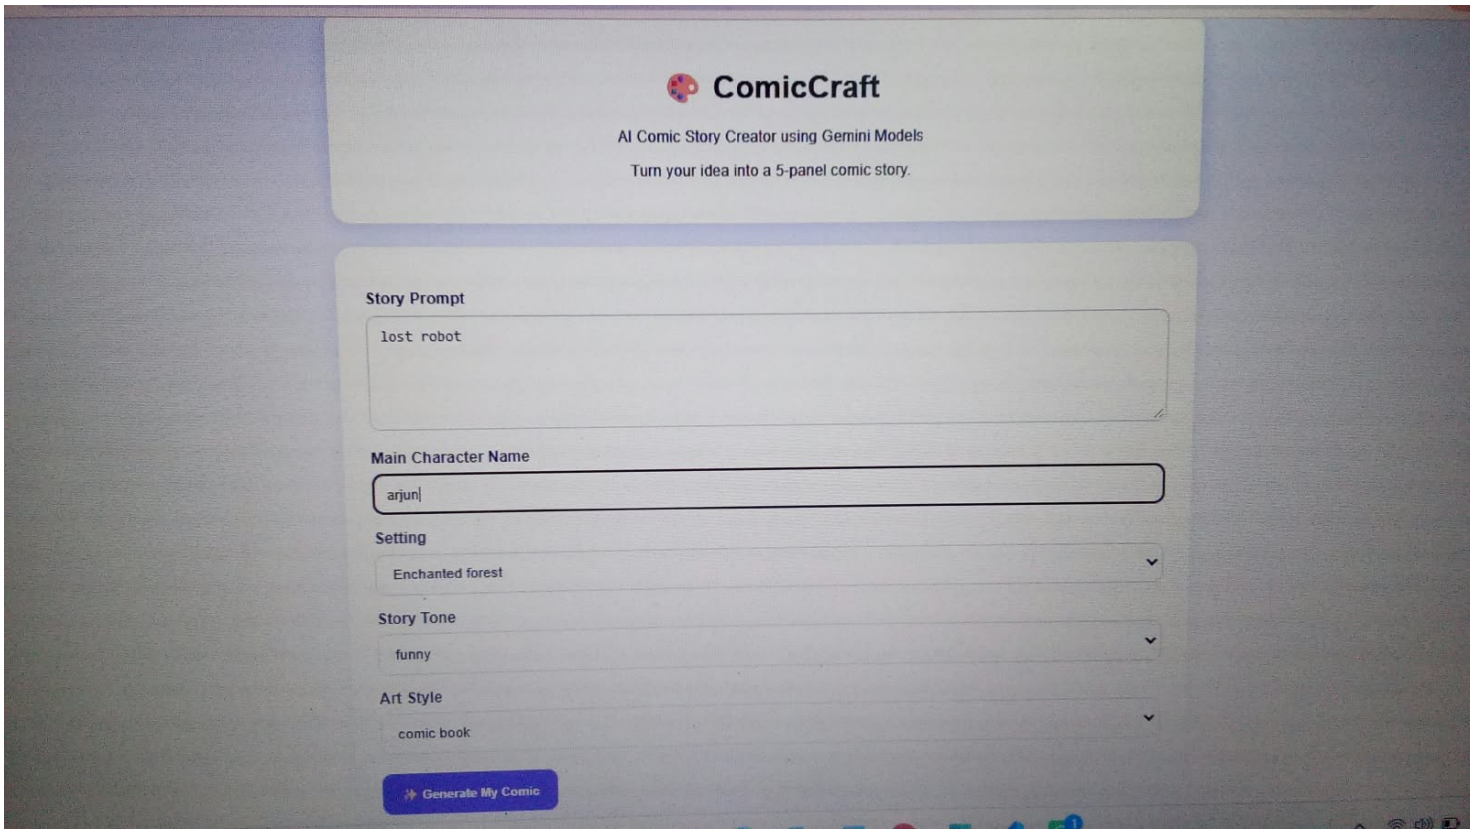

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	Not measured	Not tested	Not measured
2	Response Time (Max)	< 5 seconds	Not measured	Not tested	Not measured
3	Throughput (Req/sec)	To be measured	Not measured	Not tested	Not measured
4	Error Rate	< 1%	Not measured	Not tested	Not measured
5	CPU Utilization	< 80%	Not measured	Not tested	Not monitored
6	Memory Utilization	< 80%	Not measured	Not tested	Not monitored

Step 4: Observations & Analysis

S.NO	OBSERVATION / ANALYSIS	RESULT
1	Story generation was tested with different prompts.	Story generated successfully
2	Five-panel comic generation was tested.	Comic panels generated successfully
3	AI image generation was tested for comic panels.	Images generated successfully
4	PDF export and download were tested.	PDF generated successfully
5	FastAPI `/docs` was tested for API access.	API documentation accessible
6	Application stability was observed during testing.	Application worked without crash

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

ComicCraft
AI Comic Story Creator using Gemini Models
Turn your idea into a 5-panel comic story.
Story Prompt
lost robot
Main Character Name
arjun
Setting
Enchanted forest
Story Tone
funny
Art Style
comic book
Generate My Comic
